

MPI MicroPositioner

MPI offers a huge variety of backlash-free MicroPositioners to address every operational and measurement condition, varying from small footprint to micrometer driven high-resolution positioners for RF and mmW applications.

Unified Z-direction, ergonomic operation, and a strong magnetic base enable fine probe placement for high contact quality, producing unsurpassed measurement results. MPI MicroPositioners are designed with universal interface compatible to all probe arms for ease of application specific adaptations.

Design varieties allow operators to choose MicroPositioners which fit their operational familiarity, thus providing immediate proficiency.

The MPI self-developed MicroPositioners are designed without compromise. The full carbon-steel structure enables stable contact over long periods of time and superior positioning accuracy.

MP25 MicroPositioner: The Small One

Feature resolution*:	< 4 μm
Travel range (X/Y/Z):	10 / 10 / 10 mm
Screw resolution (X/Y/Z):	500 / 500 / 500 μm
Mounting:	Magnetic
Base stage size:	25 mm
Footprint:	55 mm x 40 mm
Versions:	Right or left
Application:	IV/CV coaxial and ultra-low current triaxial measurements

Dimensions - DC arm and tip

unit: mm

*Feature resolution is a subjective number, which depends on the operator skills.

MP40 MicroPositioner: The Universal One

Feature resolution*:	< 3 μ m
Travel range (X/Y/Z):	13 / 13 / 13 mm
Screw resolution (X/Y/Z):	300 / 300 / 300 μ m
Mounting:	Magnetic
Base stage size:	40 mm
Footprint:	65 x 40 mm
Versions:	Unidirectional
Application:	Accurate IV/CV coaxial, ultra-low current triaxial and RF measurements

Dimensions - DC arm and tip

Dimensions - RF arm (E/W) and TITAN™ probe

Dimensions - RF arm (N/S) and TITAN™ probe

unit: mm

MP50 MicroPositioner: The Kelvin One

Feature resolution*:	< 0.5 or < 1 or < 2 μm
Travel range (X/Y/Z):	13 / 13 / 13 mm
Screw resolution (X/Y/Z):	125/125/125 or 250/250/250 or 500/500/500 μm
Mounting:	Magnetic
Base stage size:	50 mm
Footprint:	86 x 60 mm
Versions:	Right and left
Application:	Extreme accurate IV/CV coaxial, ultra-low current triaxial measurements, internal node probing

Dimensions - DC arm and tip

Dimensions - Flex arm and tip

*Can vary depends on adjusted positions

unit: mm

MP60 MicroPositioner: The RF One

Feature resolution*:	< 1 µm or < 2 µm
Travel range (X/Y/Z):	20 / 20 / 13 mm
Screw resolution (X/Y/Z):	250 / 250 / 300 µm or 500 / 500 / 300 µm
Mounting:	Magnetic
Base stage size:	60 mm
Footprint:	89 x 60 mm
Versions:	Right and left
Application:	Accurate and stable RF measurements

Dimensions - E/W arms and TITAN™ probe

Dimensions - N/S arms

Dimensions - RF arm* for ShieldEnvironment™, E/W, STD or LTM version and TITAN™ probe

*The arms are compatible with all MP60 versions and MP50 MicroPositioner

unit: mm

MP60-MR MicroPositioner: The Micrometer One

Feature resolution*:	< 2 µm
Travel range (X/Y/Z):	13 / 13 / 13 mm
Screw resolution (X/Y/Z):	500 / 500 / 300 µm
Mounting:	Magnetic
Base stage size:	60 mm
Footprint:	89 x 60 mm
Versions:	Right and left
Application:	Accurate and stable RF measurements

Dimensions - E/W arms and TITAN™ probe

Dimensions - RF arm* for ShieldEnvironment™, E/W, STD or LTM version and TITAN™ probe

*The arms are compatible with all MP60 versions and MP50 MicroPositioner

unit: mm

MP60-DM MicroPositioner: The Most Accurate One

Feature resolution*:	< 0.5 μm
Travel range (X/Y/Z):	12.5 / 12.5 / 12.5 mm
Screw resolution (X/Y/Z):	25 / 25 / 25 μm
Mounting:	Magnetic
Base stage size:	60 mm
Footprint:	89 x 60 mm
Versions:	Right and left
Application:	Accurate and stable RF measurements

Dimensions - E/W arms and TITAN™ probe

Dimensions - N/S arms

unit: mm

PMP60 MicroPositioner: The RF Programmable One

Feature resolution*:	< 2 μm
Travel range (X/Y/Z):	13 / 13 / 13 mm
Minimum Step Size (X/Y/Z):	0.1 μm
Resolution (X/Y/Z):	0.015 / 0.015 / 0.015 μm
Screw resolution (X/Y/Z):	300 / 300 / 300 μm
Mounting:	Bolt-down
Base stage size:	60 mm
Footprint:	160 x 149 mm
Versions:	Up to four E / W / N / S, depends on system and arm configuration
Application:	Accurate and stable RF measurements

unit: mm

MP80 MicroPositioner: The mmW One

Feature resolution*:	< 2 μm
Travel range (X/Y/Z):	25 / 25 / 15 mm
Screw resolution (X/Y/Z):	500 / 500 / 500 μm
Mounting:	Bolt-down
Base stage size:	80 mm
Footprint:	100 x 80 mm
Versions:	Right and left
Application:	Accurate and stable RF measurements, broadband and mmW measurements

unit: mm

PMP80 MicroPositioner: The mmW Programmable One

Feature resolution*:	< 2 μm
Travel range (X/Y/Z):	25 / 25 / 10 mm
Minimum Step Size (X/Y/Z):	0.1 μm
Resolution (X/Y/Z):	0.025 / 0.025 / 0.025 μm
Screw resolution (X/Y/Z):	500 / 500 / 500 μm
Mounting:	Bolt-down
Base stage size:	80 mm
Footprint:	216 x 193 mm
Versions:	E/W or R/L, depends on system & arm configuration
Application:	Accurate & stable broadband and mmW measurements

unit: mm

MP80-DX MicroPositioner: The multi-line TRL

Feature resolution*:	< 2 μm
Travel range (X/Y/Z):	25 / 25 / 15 mm
Screw resolution (X/Y/Z):	500 / 500 / 500 μm
Mounting:	Bolt-down
Base stage size:	80 mm
Footprint:	100 x 80 mm
Versions:	Right and left
Application:	Accurate and stable RF, broadband and mmW measurements. Ideal for multi-line TRL calibration

unit: mm

MP3X MicroPositioner: The Large One

Feature resolution*:	< 2 μm
Travel range (X/Y/Z):	25 / 25 / 5 mm
Screw resolution (X/Y/Z):	500 / 500 / 167 μm
Maximum Load:	20 kg
Mounting:	Bolt-down
Mounting platform:	505 x 300 mm, M6 screw holes in 25 mm pitch
Versions:	Right and left
Application:	Accurate noise figure and load pull measurements

MP4X MicroPositioner: The Large One with Planarization

Feature resolution*:	< 2 μm
Travel range (X/Y/Z):	25 / 25 / 5 mm
Travel range (T):	Total 6 degree
Resolution (X/Y/Z):	0.05 / 0.05 / 0.0083 μm
Screw resolution (X/Y/Z):	500 / 500 / 167 μm
Screw resolution (T):	0.16 degree/rev.
Maximum Load:	20 kg
Mounting:	Bolt-down
Mounting platform:	480 x 300 mm, M6 screw holes in 25 mm pitch
Versions:	Right and left
Application:	Vector load pull with tuners and direct mounted RF probes

MicroPositioner – Application Matrix

Mounting Position for DC Probe Arms on MP25 to MP60*

*Probe arms are mounted by two screws M3 x 8 mm

MPI Accessories

MPI offers a complete portfolio of accessories including coaxial, triaxial, RF probe arms, high-temperature Kelvin and high-current probes up to 400 A.

Kelvin Arms

MPI is offering a wide range of Kelvin Probe arms.

The standard Kelvin holder has a unique vertical self-leveling probe tip which is isolated as close as possible to the DUT. Dedicated designs for ESD and sensitive noise measurements are optional available as well.

They are the new benchmark for accurate ultra-low noise, impedance or pulsed-IV measurements.

Making a novice user able to perform fast and accurate ultra-low impedance measurements, Kelvin probes provide easy reconfiguration for 4TP-connection or/and splitting the ground for pulsed-IV tests.

The HT-Kelvin probes in addition are offering unsurpassed capability for high temperature measurements up to 300 °C. The LTM-Kelvin version, is dedicated design for Long-Term Measurements and enable Automated Test over Multiple Temperatures ATMT™.

Flex Arms

MPI Flexible probe arms are designed explicitly to address the specific requirements of Product Engineering, Failure Analysis and Design Validation applications. Simultaneously probing with probe cards, even at negative temperature are supported by free adjustable angles and lengths of the arm. In parallel the design provides maximum on stability in order to perform measurements on small features. Non-50 Ohm cable-end option offers easy connection with oscilloscopes as example!

RF Arms

RF probe arms enable easy and very convenient probe planarization having a large cap on top of the high-end Mitutoyo micrometer and dedicated labeling for the proper direction. The fast and tool-less vertical height adjustments with built-in mm-scale is a small example of great usability by working with different RF probe technologies. Every arm comes in standard configuration with two cable strength-relieves, which guide the cables even in case of dual RF probes safety and tender without crushing the cables.

Accessories

Extensive selection and dedicated design of vibration isolation platforms, tables with integrated racks for computer, keyboard tray, a dual monitor stand, EMI-shielded DarkBoxes, probe cards and PCB test holders, vacuum pumps and air compressors are a few examples for the variety of accessories completing the common MPI Test Solution Systems.
