WAFER LOADING

Loading or unloading of up to 200 mm wafer, single IC or substrate is straight forward and intuitive. No roll-out stage allows for a simple method of automation for RF calibration and probe card cleaning. Easy access to the AUX chucks for handling of calibration substrates, cleaning or contact check pads.

INTEGRATED CONTROLS

The thermal chuck can be operated by using the fully integrated touch-screen display, placed at convenient location in front of the operator for fast and operation and immediate feedback.

The intelligent hardware control panel is completely integrated into the probe system and is designed based on decades of experience and customer interactions to provide faster, safer and convenient system control and test operation. The Keyboard and mouse are strategically located to control the software if necessary and will also control the Windows® based instrumentation.

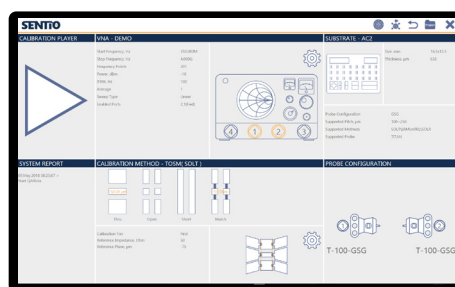

Easy to access vacuum control for the chuck (supports center at 4x4 mm, 100 mm, 150 mm and 200 mm) and the auxiliary chucks as well. USB connection to the systems controller, right in front for convenient data exchange.

SOFTWARE SOLUTION

MPI automated engineering probe systems are controlled by a unique and revolutionary, multi-touch operation SENTIO® Software Suite – simple and intuitive operation saves significant training time, the Scroll, Zoom, and Move commands mimic modern smart mobile devices and allows everyone to become an expert in just minutes. Switching between the active application and the rest of the APPs is just a matter of a simple finger sweep.

By implementing intuitive multi-touch operation, QAlibria® provides crisp and clear guidance to the RF calibration process, minimizes configuration mistakes and helps to reach accurate calibration results in fastest time. QAlibria® offers industry standard and advanced calibration methods. QAlibria® includes TOSM (SOLT), TMR, TMRR methods, and 4-port calibration capability additionally to the integration of NIST StatistiCal calibration packages providing easy access to the NIST multiline TRL metrology-level calibration and uncertain analysis.

INTEGRATED DARK BOX

TS2000-D and TS2000-DP are designed with fully integrated DarkBox.

The design allows light sensitive measurement capability and in case of TS2000-DP interlock system for safety measurements up to 10kV and 600A.
